CAREER HISTORY

SOFTWARE ENGINEER
2019-2020

- writing and leading the web development team for the Giftata frontend web application

- Wrote and designing the Admin portal for client additions to the node backend

EDUCATION & TRAINING

GENERAL ASSEMBLY
Software Engineering Immersive | Graduate 2019

- Graduated from the intensive 4 month course on web development at GA. Required us to create 4 full stack applications using different stacks and pass grading criteria set by the instructors.

- Freelance work with multiple clients building full stack applications.

- Working at Giftata as Sr. React Engineer.

PROJECTS

Dave Designs
davedesigns.netlify.app

- Website I built for a client in New Hampshire. Uses Gatsby to show his wood working skills. no backend, but uses netlify cms to allow the client to update the content and push to the live deploy as they wish.

Giftata Fontend (Beta - In development)
beta.giftata.com

- Next/typescript/scss application that allows you to find custom curated presents for your friends. You can track their birthdays and all upcoming events that require gift giving and find that perfect present through our app.
